**KIND 4 stores**  
pure shopfitting

# FRUIT & VEGETABLES

## Shopfitting excellence

This is shopfitting with **KIND4stores**: strong design and the final touch in practical implementation. For all kinds of product ranges, small shops and large stores, food and non-food. From the smallest space to the biggest sales floor. Whether standard components or bespoke designs, we'll find the solution for you!

Our primary goal is to guide our retail customers to success in their business. Many of them have been fitting out their shops with our trend-setting solutions for decades. Most **KIND4stores** products are made in Germany, the rest in Central Europe. This means short distances and reliable planning, which are more important today than ever before.

Since 2023, **KIND4stores** has been busy merging the shopfitting activities of König Object Consulting, HARRES Metall-design, Otto Kind and ZOK-system. Under the umbrella of NWI (Frankfurt), the shopfitting group brings together planning expertise, modular shopfitting systems, customised furniture construction and high production capacities made in Germany.

# Fruit & vegetables at their very best

The fresh produce department is the flagship in the food retail business. It is here that customers look around very attentively – and yet allow themselves to be tempted by an attractive and varied display of fresh goods.

As shopfitting specialists, the **KIND4stores** team knows from experience why it pays off to excel and stand out among your competitors especially in this department: the fresh produce department has long since become a major USP!

### **Boosting sales with freshness ambassadors**

For consumers, fresh produce expertise is one of the key criteria when choosing their market. Among the groups of fresh goods, the fruit and vegetables sales area is clearly at the top of the grading scale, even ahead of the meat department.

*“This is my favourite market. The fruit and vegetables department is simply wonderful.”*

It goes without saying that customers expect the produce to be freshly picked, delicious, and as natural as it comes. But it isn't just the goods that have to make customers' taste buds tingle, it's also how they are presented. That's why an attractive fresh produce department with a pleasant shopping atmosphere can make a decisive contribution to boosting sales significantly.

Consumers who are satisfied with what a store has to offer in the way of fresh goods spend considerably more money there than customers who aren't impressed by it!

# Professional furnishing solutions for your

With our **KIND4stores** shopfitting brand we create solutions for retailers to present their fruit & vegetables products at their very best. They aim to make your customers' shopping

- as easy and convenient as possible,
- an outstanding experience
- a reliable source of information.

## Why you will always get the cherry on the top with us

When it comes to the design and manufacturing of shelving systems we can draw on decades of experience.

We manufacture our **KIND4stores** quality products at our own facilities in Germany, subject to external audits and continuous quality checks. Our portfolio ranges from standardised and scalable shopfitting systems to individual and bespoke shop and store solutions. Our customers include discounters as well as premium supermarkets and self-service hypermarkets.

# flagship department

# Starring fruit & vegetables

We have designed our fruit & vegetable solutions to keep the actual display unit with its unobtrusive and high-quality design in the background. Instead, the stage belongs to an abundant variety of juicy fruit, crispy salads and fresh vegetables – a colourful feast for the eye designed for full effect.

Slim constructions ensure that a maximum of goods can be arranged in a minimum of space. This gives the impression that there are fruit and vegetables aplenty, effectively increasing sales impact. Carefully selected decorative elements set the right visual accents to individualise and adapt the shelving system.

## Customer experience in fresh produce paradise

First of all, have your customers slow down, stimulate their senses, set their mood for pleasure... The fresh produce department is where the customer route typically starts and the course is set for the entire shopping journey.

This makes it all the more important to create a pleasant atmosphere, for instance by state-of-the-art lighting technology, coordinated colours and materials, ceiling canopies, acoustic walls etc.

All these details build the foundation of narratives and create the ambience that stages fruit and vegetables, enabling them to arouse emotions.

# A world of flavours: from regional to exotic

A conscious and healthy diet, natural food and regional shopping are consumer trends that will continue to gain in significance. An increasing number of people prefer seasonal produce, harvested in the region when ripe and transported a short distance from producer to consumer. Even those who don't buy exclusively organic food want to know the origin of the pears, berries, cabbage and potatoes on display. A lot of customers are even keen to know the agricultural producer, just like when going to the weekly market, where people prefer to buy from their trusted market stall.

We help you bring the weekly market success story to your sales area: with stories and images of country-style farmer's markets with organic potatoes, fresh asparagus and ripe seasonal fruit, supplemented by cross-selling products such as honey – all regional produce.

Of course, there are other ways of staging fresh produce: for instance, a Provençal market with oxheart tomatoes, sun-ripened apricots, fresh herbs, olive oil and lavender. Or – something completely different – a noble fresh produce palace with fine vegetables and exotic fruit, inspired by haute cuisine.

We look forward to assisting you with your own storytelling – adapted to your product range and customer preferences.

## Well informed

“Where can I find...?” Most questions from customers refer to the specific products they are searching for. Organise your fruit and vegetables – with the **KIND4stores** shelving system. A neatly structured range of products laid out clearly, for instance by product group, and informative labelling helps customers find their way. Every customer who knows where to find what they have on their shopping list unburdens the technical staff who can then focus fully on recommending what to purchase and give advice where it is really needed.

**FROM  
SHELF  
TO TABLE  
AS IF  
FRESHLY  
HARVESTED!**

# The multifunctional furnishing system that suits

A special benefit of the **KIND4stores** shelving system for fruit & vegetables is its special flexibility.

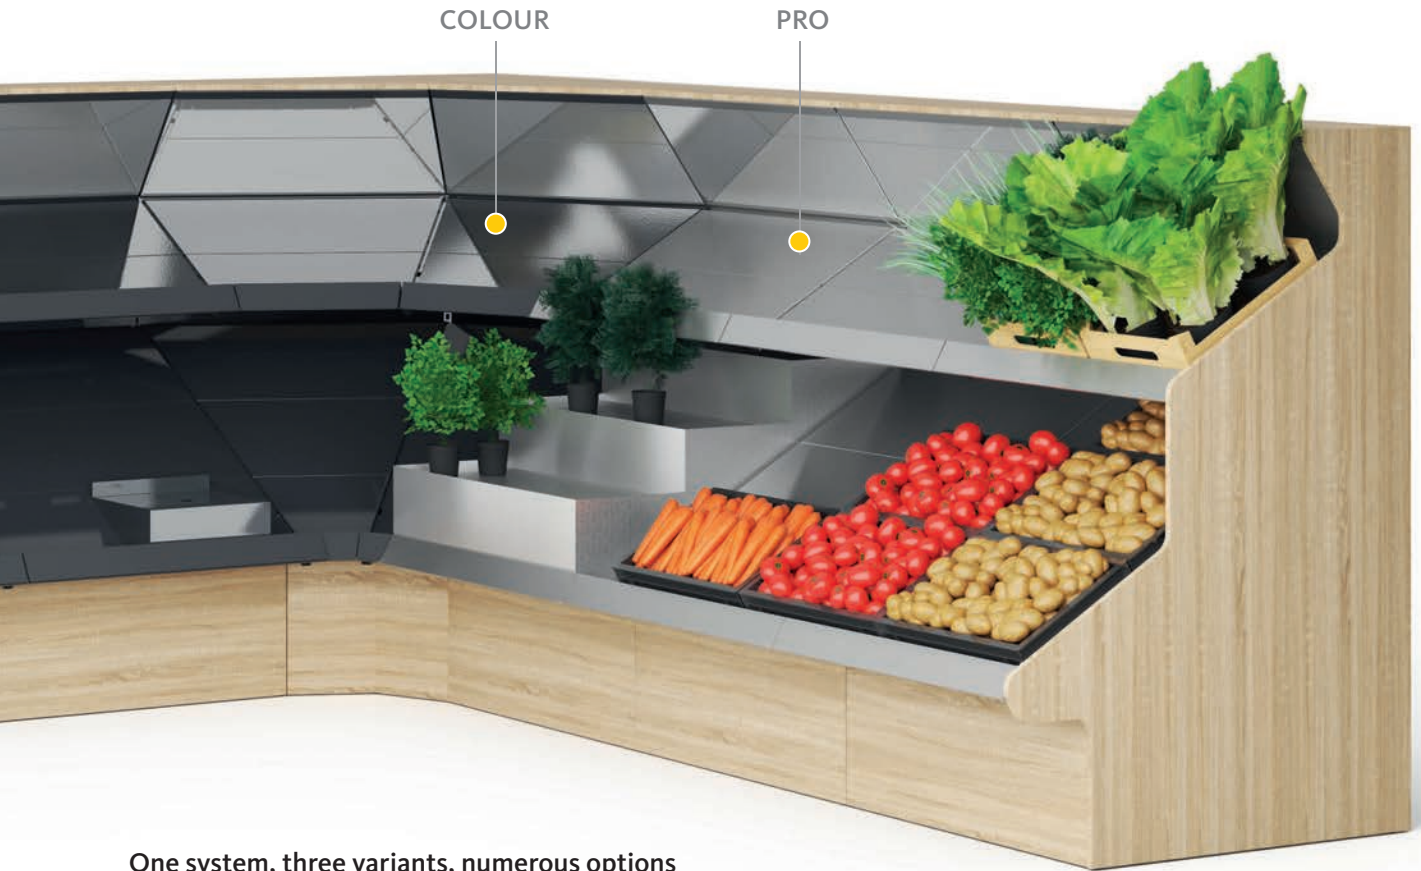

Thanks to its modular design tailored to the needs of the fresh produce department, our solution can be adapted easily to the specific prerequisites of your store and made to fit perfectly. The outstanding variability allows for virtually all directions of customer routing with external wall shelves and freestanding gondola shelving units. Our product range has even more advantages: it can be reconfigured quickly and is easily enlarged with additional components.

The **KIND4stores** solution ensures the highly efficient placement of products and provides the best prerequisites for additionally implementing current consumer trends and customer needs: e.g. themed displays such as local specialities, the presentation of high-margin convenience products such as fresh cuts and smoothies, promotional areas for sample tasting, service zones such as asparagus peeling stations, etc.

# virtually all requirements

## One system, three variants, numerous options

A shelving system that can be easily adapted to growing business and changing demands: The first step is to put together a low-cost entry-level solution that can be enlarged by additional modules as needed, changed visually and upgraded to appeal to the needs of premium customers.

You can choose from three designs:

**BASIC:**  Open metal tubing system, e. g. for discounters

**PRO:**  Design in brushed stainless steel

**COLOUR:**  Powder-coated metal in RAL standard colours\*  
\*custom colours on request

# The difference is in the details

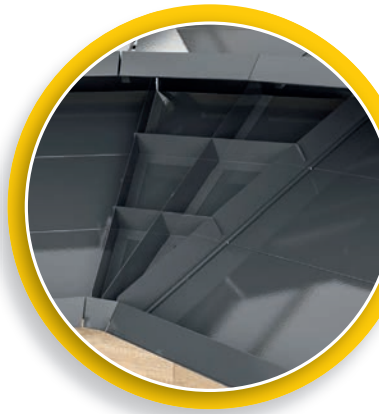

It's worth taking a close look: KIND4stores shelving systems incorporate the latest developments and decades of experience.

Adjustable to accommodate different product sizes and formats through **display depths** of 400, 600, 800 or 1200 mm.

**Bag dispensers** can be placed in various positions easily accessible for customers.

Stock corner units efficiently: **horizontal dividers for corner shelves** create order and a clear structure.

**Crate stoppers** secure product crates in place.

**Various finishes** offer individual design options.

**Drawers** at the front of the shelving unit provide additional.

The **herb ladder** can be placed anywhere to spice up the shelf structure.

**Stainless steel display surfaces** make cleaning easier, thus guaranteeing a high standard of hygiene.

The **display depths** are in line with standard crate sizes, allowing the gap-free filling of the shelves.

**100 mm price holders** ensure full visibility of price labelling. The cover protects against dirt.

**Front panel with sealing lip** magnetic, protects against damage and water penetration – also when using cleaning machines. (Only available for metal finishes!)

The scales can be placed on a **pedestal** at the front of the shelf, where they are easy and convenient for customers to use.

# GOOD(S) VARIETY – VERSATILE SHELF SOLUTIONS!

This brochure contains only a small selection of the **KIND4stores solutions** for fruit & vegetable displays.

We would be pleased to advise you personally (in an individual consultation) and give you an idea what your specific market could look like.

**Our experts look forward to discussing options with you!**

# INFORMATION

## Ordering information | Colour key

### Ordering information

The shop fitting system for fruit and vegetables offers an extensive range of units in a wide variety of combination and design options, including product-specific additions.

To make it as easy as possible for you to select and put together your desired configuration, here are some notes on dimensions, abbreviations and colour keys:

- All dimensions indicated in this catalogue are nominal dimensions.
- All dimensions are indicated in millimetres  
**Example:** D570 = depth 570 mm, H2200 = height 2200 mm
- Please refer to the table on the right for abbreviations/short names

### Colour key

The **HK**system units are available in the following RAL standard colours. Simply add the four-digit colour code of our RAL colour key to the item numbers of the **HK**products in your order.

**Example:** HK25item in RAL 7016 (Anthracite grey)

Item number + colour code addition number  
= C100020-2377

Naturally, we are also happy to fulfil special colour requests and will be pleased to advise you.
